

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method of recording and/or playback of recorded interactive television, said method comprising the steps of:

tagging of recorded interactive television content with identification information for access control to the recorded interactive television content; and
controlling access to said recorded interactive television content in such a manner that recorded interactive television content may only be deleted or modified by an application that recorded said interactive television content,

wherein said identification information comprises information identifying an interactive television application that caused the recording of said interactive television content.

2. (Currently Amended) The method ~~according to~~ as claimed in claim 1, wherein said interactive television content is audio/visual content associated to said interactive television application.

3. (Cancelled).

4. (Cancelled).

5. (Currently Amended) The method ~~according to~~ as claimed in claim 1, ~~wherein said~~ identification information ~~being further~~ ~~comprises comprising~~ information identifying a broadcaster who broadcast said application and said recorded interactive television content for recording.

6. (Currently Amended) The method ~~according to~~ as claimed in claim 2, ~~comprising wherein said method further comprises the step~~ of:
.....indicating..... to a play-back application for playing back interactive television content, which other interactive television content stored on a storage medium is related to said play-back application by means of said identification information.

7. (Currently Amended) The method ~~according to~~ as claimed in claim 6, ~~comprising wherein said method further comprises the step~~ of:
..... said play-back application allowing a user to navigate between a plurality of said stored related interactive television content.

8. (Cancelled).

9. (Currently Amended) The method ~~according to~~ as claimed in claim 1, wherein said interactive television content is recorded as files.

10. (Currently Amended) The method ~~according to~~as claimed in claim 9, ~~comprising wherein said method further comprises the step of:~~

.....storing said interactive television content, said interactive television application and said identification information in separate files.

11. (Currently Amended) The method ~~according to~~as claimed in claim 10, wherein said identification information is stored in an info file being linked to at least one interactive television application, said info file comprising a table with related interactive television content to said interactive television application on said storage medium.

12. (Currently Amended) The method ~~according to~~as claimed in claim 1, wherein said interactive television is MHP.

13. (Currently Amended) The method ~~according to~~as claimed in claim 1, ~~wherein said~~ interactive television content ~~being is~~ at least one audio/visual stream.

14. (Currently Amended) A computer-readable medium having embodied thereon a computer program for processing by a computer, the computer program, when used, ~~being for performing the method according to claim 1, comprising:~~

a code segment for ~~tagging of~~causing said computer to tag recorded interactive television content with identification information for access control to the recorded interactive television content; and

~~a code segment for causing said computer to control access to said recorded interactive television content in such a manner that recorded interactive television content may only be deleted or modified by an application that recorded said interactive television content.~~

~~wherein said identification information comprises information identifying an interactive television application that caused the recording of said interactive television content.~~

15. (Cancelled).

16. (Cancelled).

17. (Currently Amended) ~~Apparatus~~An apparatus for recording and/or playback of recorded interactive television, ~~said apparatus~~ comprising:

a memory for storing interactive television content; and
a central processing unit, conceived to tag recorded interactive television content with identification information for access control to the recorded interactive television content; and
~~to control access to said recorded interactive television content in such a manner that recorded interactive television content may~~

only be deleted or modified by an application that recorded said
interactive television content.

wherein said identification information comprises
information identifying an interactive television application that
caused the recording of said interactive television content.
